

Faculty: BSC(Hons) Computer System Engineering

NAME: Rahul Chaudhary

Student ID: 250818187

MODULE CODE: CET138

MODULE TITLE: Full Stack Development

MODULE LEADER: David Grey

SUBMISSION DATE AND TIME: Fri, 19 Jun 2026

ASSIGNMENT: 1

Academic Misconduct is an offence under university regulations, and this involves:

- **Plagiarism** – where you use information from another information source (including your previously submitted work) and pass it off as your own. This can be through direct copying, poor paraphrasing and/or absence of citations.
- **Collusion** – where you work too closely, intentionally, or unintentionally, with others to produce work that is similar in nature. This can be through loaning of materials, drafts or through unauthorised use of a fellow student's work.
- **Asking another person to write your assignment** – where you ask another individual or company to complete your work for you, be that paid or unpaid, and submit it as if it were your own.
- **Unauthorised use of artificial intelligence** – where you use artificial intelligence tools to generate your assignment instead of completing it yourself and/or where you have not been given permission to use artificial intelligence tools by your module leader. Please complete the following declaration around your use of artificial intelligence tools in your assignment.

STATEMENT ON USE OF ARTIFICIAL INTELLIGENCE TOOLS:

• I have used artificial intelligence tools to generate an idea for my assignment:	YES
• I have used artificial intelligence tools to write my assignment for me:	NO
• I have used artificial intelligence tools to brainstorm ideas for my assignment:	NO
• I have used artificial intelligence tools to correct my original assignment:	NO

DECLARATION

- I understand that by submitting this piece of work I am declaring it to be my own work and in compliance with the university regulations on Academic Integrity.
- I confirm that I have done this work myself without external support or inappropriate use of resources.
- I understand that I am only permitted to use artificial intelligence tools in line with guidance provided by my Module Leader, and I have not used artificial intelligence tools outside this remit.
- I confirm that this piece of work has not been submitted for any other assignment at this or another institution prior to this point in time.
- I can confirm that all sources of information, including quotations, have been acknowledged by citing the source in the text, along with producing a full list of the sources used at the end of the assignment.
- I understand that academic misconduct is an offence and can result in formal disciplinary proceedings.
- I understand that by submitting this assignment, I declare myself fit to be able to complete the assignment and I accept the outcome of the assessment as valid and appropriate.

CET138 Full Stack Development

1. What is HTML?

HTML (HyperText Markup Language) is the language that forms the structure of the web. The demo-html.html is a document that displays HTML to its purest form — no CSS, no JavaScript; just semantic markup which defines the meaning and structure of each piece of content on the page.

2. Document Structure in demo-html.html

The demo page is structured according to the document structure of HTML5. The <head> section includes invisible metadata, and the <body> section includes everything visible: it is divided into meaningful sections.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />
  <title>HTML Demo</title>
  <!-- No CSS linked - demonstrates pure HTML structure -->
</head>
<body>
  <header>
    <h1>CodeCraft &mdash; HTML Demo</h1>
    <nav><ul>
      <li><a href="#about">About</a></li>
      <li><a href="#courses">Courses</a></li>
      <li><a href="#team">Team</a></li>
      <li><a href="#contact">Contact</a></li>
    </ul></nav>
  </header>
  <main> ... page content ... </main>
  <footer> ... </footer>
</body>
</html>
```

</h3>3. Semantic Elements Used

The demo uses proper semantic HTML5 elements throughout, giving the page meaningful structure that browsers, search engines, and screen readers can all understand.

Element Used	Where in demo-html.html	Semantic Purpose
<header>	Wraps the site title and navigation	Introductory content for the page
<nav> +	Navigation bar with anchor links	Block of navigation links
<main>	Wraps all four content sections	Primary unique content — one per page
<section id="...">	About, Courses, Team, Contact	Thematic grouping with its own heading
<h1> / <h2> / <h3>	Page title, section headings, sub-headings	Logical heading hierarchy

```
</div>
<main> ... page content ... </main>
<footer> ... </footer>
</body>
</html>
```

<blockquote>	Warren Buffett quote in About section	Extended quote from an external source
<footer>	Copyright line at page bottom	Footer — copyright, address, legal info
<dl> / <dt> / <dd>	Instructor list in the Team section	Description list — term and definition pairs
<hr />	Dividers between sections	Thematic break between content areas

4. Table — Course Comparisons

The Courses section includes a full data table with `thead`, `tbody`, and `scoped th` elements — demonstrating correct semantic table markup:

```
<table border="1">
  <thead>
    <tr>
      <th>Course</th>
      <th>Duration</th>
      <th>Price (NPR)</th>
      <th>Level</th>
    </tr>
  </thead>
  <tbody>
    <tr><td>HTML Basics</td><td>1 Week</td><td>5,000</td><td>Beginner</td></tr>
    <tr><td>CSS Design</td><td>2 Weeks</td><td>8,000</td><td>Beginner</td></tr>
    <tr><td>JavaScript</td><td>1 Month</td><td>15,000</td><td>Intermediate</td></tr>
    <tr><td>React Dev</td><td>2 Months</td><td>25,000</td><td>Advanced</td></tr>
    <tr><td>Data Science</td><td>3 Months</td><td>30,000</td><td>Advanced</td></tr>
  </tbody>
</table>
```

5. Form — Contact / Enrolment

The Contact section contains a fully structured enrolment form with two fieldsets (Personal Information, Course Interest), all input types correctly labelled, and submit/reset buttons:

```

<form action="#" method="post">
  <fieldset>
    <legend>Personal Information</legend>
    <label for="fname">First Name:</label>
    <input type="text" id="fname" name="fname" placeholder="Aarav" />
    <label for="email">Email Address:</label>
    <input type="email" id="email" name="email" />
    <label for="phone">Phone Number:</label>
    <input type="tel" id="phone" name="phone" />
  </fieldset>
  <fieldset>
    <legend>Course Interest</legend>
    <select id="course" name="course">
      <option value="">-- Choose a course --</option>
      <option value="html">HTML Basics</option>
      <option value="js">JavaScript</option>
    </select>
    <input type="radio" id="morning" name="schedule" value="morning" />
    <label for="morning">Morning (9am - 12pm)</label>

```

```

    <input type="checkbox" id="agree" name="agree" />
    <label for="agree">I agree to the Terms and Conditions</label>
  </fieldset>
  <textarea id="message" name="message" rows="4"></textarea>
  <button type="submit">Send Message</button>
  <button type="reset">Clear Form</button>
</form>

```

6. Summary

The CodeCraft HTML demo demonstrates correct, semantic HTML5 mark-up in a context of a real training site. Each element is selected because of its meaning, not appearance:

- Proper HTML5 document structure: <!DOCTYPE html>DOCTYPE html>, lang attribute, and viewport meta
- No layout divs (header, nav, main, section, footer)
- The use of one h1 (for the page title) and h2 (for sections) and h3 (for sub-topics) header tags should be ensured.

- Data table with thead, tbody, and appropriate th column headers

Directs the user to choose two field sets to complete, which contain text, email, Tel, select, radio, checkbox and text area controls.

- Include anchor, external, mail to and tel hyperlinks in the “Quick links” section.
- Description list (dl/dt/dd) for the instructor team — semantically suitable for term-definition content
